}

## Personal statement {

I am an experienced Java developer who is mostly focused on the backend but with a strong frontend background in the past. Open to challenges and new technologies and have a *nothing-is-impossible* mindset.

}

## Skills { /\* anything missing? ask me! \*/

**Languages** { Java, Python, JavaScript, Groovy, PowerShell, Shell }

**Java** { Spring, JAX-RS, futures and streams, junit, Mockito, Hibernate }

**Environment** { Kafka, Elasticsearch, Kubernetes, Google Cloud, Tomcat }

**Builds** { Maven, Gradle, Git, Docker, Jenkins, TeamCity }

**Web** { REST, HTML, CSS, JS, jQuery, AngularJS }

**Other** { Postman, JMeter, SQL, Jira, UX, UML, PHP, C# }

}

## Education {

- B.S. - M.S., 2005 - 2011, Computer Science

State University of Informational Technologies, Saint Petersburg, Russia

- Certificate, 2011, UX design essentials

}

## Projects & Experience { /\* work since 2006, Java since 2011 \*/

**B2B marketplace for fashion** /\* fashionTrade in Amsterdam \*/ { 2018 - 2019

**Roles** { Java developer }

**Keywords** { Java, JAX-RS, REST, Python, Docker, GKE, Elasticsearch }

**Project description** {

Online trading platform, digitising the ordering process for fashion brands and retailers.

}

**Highlights** {

- Develop CRM integration with built-in smartness to disambiguate incoming data without fixed structure against existing in the system

- Build and support external and internal dev and integration tools

}

}

**Digital eXperience Accelerator** /\* SDL in Amsterdam \*/ { 2015 - 2018

**Roles** { Java developer, later a team leader }

**Keywords** { Java, Spring, Maven, Gradle, Jenkins, Tomcat, Open-source }

**Project description** {

An open-source community-driven API wrapper on top of the company's main product - complex enterprise CMS. Implemented in Java & .NET.

}

**Highlights** {

As a main Java developer, I worked here in close relation with ".NET half" in order to implement the same API in both technologies.

}

}

```

API for wind turbines /* EPAM for MeteoGroup in Krakow */ { summer 2015
  Roles { Java developer }
  Keywords { Java, PostgreSQL, Hibernate, Maven, Spring Boot, REST }
  Project description {
    The REST API that converts weather forecast data to a prediction of
    productivity of wind turbines at requested time ranges.
  }
}

Landing Page Builder Wizard /* EPAM for PayPal in Krakow */ { 2014 - 2015
  Roles { Full-stack JS/Java developer }
  Keywords { Java, Spring, jQuery, AngularJS, Twitter Bootstrap, MySQL }
  Project description {
    Drag&drop browser wizard to build full-featured web pages with user
    actions tracking which doesn't require any technical knowledge.
  }
  Highlights {
    - UI and UX development and design, Java REST API for this UI
    - Due to uncertainty in requirements, we'd been practicing live UI
    prototyping sessions with a customer with immediate feedback
  }
}

Yota Bank CRM /* EPAM for Yota in Saint Petersburg */ { 2012 - 2014
  Roles { Full-stack JS/Java developer }
  Keywords { Java, Grails, jQuery, Tomcat, Oracle DB, JDBC, Hibernate }
  Project description {
    CRM system for an online bank with access to partners, payments,
    configuration of other payment systems in a bank environment.
  }
  Highlights {
    - Java Web and UI (Grails) development and prototyping
    - Data delivery scripts development using Perl and Bash
  }
}

CMS for a food retailer /* T3C in Saint Petersburg */ { 2011 - 2012
  Roles { Full-stack JS/Java developer }
  Keywords { Java, Tomcat, Alfresco, MySQL, Lucene, jQuery, TeamCity }
  Project description {
    Content & document management system for the customer with multiple
    offices all over the country to automate decision-making process.
  }
  Highlights {
    Java backend and frontend development and prototyping.
  }
}

Other less relevant experience { 2006 - 2009 - 2011
  Keywords { PHP, JavaScript, jQuery, C++, C#, MySQL, QA, Java }
}

```
